Aims and Scope: *Numerical Heat Transfer, Part B: Fundamentals* is an international journal devoted to publishing papers on aspects of the methodology for the numerical solution of problems of heat transfer, mass transfer and fluid flow. Also within the scope of the journal is the modeling of complex physical phenomena prerequisite to the attainment of numerical solutions. Papers presenting numerical or experimental results that support the methodology development are also appropriate to the journal. On the other hand, papers whose dominant thrust is the attainment and presentation of numerical results should be submitted to a companion journal, *Numerical Heat Transfer, Part A: Applications.*

Abstracted/Indexed in: CSA Aluminum Industry Abstracts; CSA Computer Information Systems Abstracts; CSA Corrosion Abstracts; CSA Engineered Materials Abstracts; CSA Environmental Sciences & Pollution Management Database; CSA Metals Abstracts/METADEX; CSA Technology Research Database; Chemical Abstracts; Current Contents/ Engineering, Computing, and Technology; Engineering Information Inc.; Engineering Index Monthly; Information Service in Mechanical Engineering (ISMEC); Materials Science Citation Index™; Nova Information Services Co.; Research Alert; Science Citation Index; SciSearch.

Numerical Heat Transfer, Part B: Fundamentals (Print ISSN: 1040-7790) is published in print bimonthly for a total of 6 print issues per year; *Numerical Heat Transfer, Part B: Fundamentals* is published online monthly for a total of 12 issues per year by Taylor & Francis Group, LLC, 325 Chestnut Street, Suite 800, Philadelphia, PA 19106. Periodicals postage paid (USPS permit number 004-509) at Philadelphia, PA and additional mailing offices.
